# ABOUT COMPANY

**APIAGRA s.r.o. (Apiagra Ltd.)** was founded in 1993. It was exclusively focused on manufacturing and assembly of air conditioning ducts. In 2001, the company moved into its administrative and manufacturing facilities. It owns 580 m<sup>2</sup> of administrative (Office) areas, 1650 m<sup>2</sup> manufacturing areas, 1600 m<sup>2</sup> of storage areas. Currently, 96 qualified employees with long-time professional records and experiences in the field of manufacturing air conditioning components provide, assembly, servicing, advisory and realization. The programme of manufacturing is focused on producing ducts of both rectangular and circular in diameters and parts of air conditioning systems. In our company, great emphasis is placed upon high quality of manufactured products and upon continuous widening of the product-spectrum. Each product leaving the manufacturing site is perfectly functional, having undergone several checks and ready for installation at the building site. By introducing optimization in technological and logistical processes, our customers are offered short time delivery as far as the site where the system is to be installed.

**APIAGRA is realizing projects with immediate entry., i.e. the project is performed in a comprehensive way starting from developing project documentation to tuning in the entire air conditioning system.**

The basic task of the company, namely the APIAGRA s.r.o. is to provide our customers high-quality products and services meeting the most demanding requirements and expectations.

## **The vision declared is ensured by the company in via:**

- Active fulfilment of tasks by each of the employees.
- Professional approach and high level of proficiency of the staff employed.
- Application of innovative methods and procedures to ensure improving efficiency of both managerial and manufacturing processes.
- Active participation of the employees in solving tasks related to the quality of both the products and services.
- Providing guarantee of high quality of product and the services provided.
- Meeting customer requirements timely and precisely.
- Applying innovated, standardized and practice-proven procedures.

# OTHER REFERENCES

The factory **Panasonic in Trstena** produces a wide range from audio electronics to the automobile industry. In this factory, we designed and assembled ventilation for new built halls, factory extensions but also different reconstructions in the manufacturing. Panasonic company uses our services for more than 20 years with satisfaction on both sides.

**Panasonic**

2<sup>nd</sup> phase of air-conditioning installation in the production hall **Delta Electronics** took place from November 2011 to August 2012.

Except an air-conditioning and a cooling system, there was installed also air humidification. The factory is located near Dubnica nad Vahom.

**Mercedes-Benz**

Sales and service centre **Mercedes Benz in Bratislava**. Company APIAGRA Ltd. participates in the order projectively and also as a supplier.

The project was designed comprehensively to all areas and facilities.

**AUDI Gyor Hungary and OPEL Katovice**, realization of exhausting Run-in cabin for cars.

Ventilation conducted for the German company Thermokabine.
